Resumo

Passionate about transforming innovative ideas into effective solutions, my professional life has always been focused on evolving in the world of technology. I have clear and efficient communication skills, seeking excellent teamwork performance and excellent deliveries for the user.

My experience focuses on web development, mainly in the Front-End area, delivering responsive interfaces with a complete and objective flow for the end user.

I currently work as an outsourced employee for the Digital Bank "BTG Pactual", the largest investment bank in Latin America. I have participated in the development of a component library called "Orquestra", based on a consistent Design System, contributing to standardization and efficiency in the interfaces of the bank's systems.

I currently work on the investment funds team in the Offshore squad, related to BTG's international funds. I develop web systems for Offshore clients, delivering efficient and objective interfaces for clients.

I always seek to engage in new learning and expand and improve my knowledge. I entered the world of programming through the "Vai na Web" program, with a degree in "Web Development - Front End", where I acquired my first knowledge in HTML, CSS, Javascript and React.

Regarding my academic life, I am currently studying Computer Science at Veiga de Almeida University (Higher Education) and Systems Development at Senac (Technical Level).

Technologies and Tools:

Design and Development Tools: Skills in design tools such as Figma. Practical experience with agile methodologies, including Design Sprint, Scrum and Kanban.

Development Technologies: Proficient in JavaScript, Vue.js, React, Angular, HTML5, CSS3, SASS, Jest, Storybook. Experience in Back-End languages such as Python, C#, PHP, and databases using SQL.

Experiência

BTG Pactual
2 anos 7 meses

Desenvolvedor web
junho de 2024 - Present (11 meses)
Rio de Janeiro, Brasil

I work as a Front-End Developer at the company "RealTask" for projects in the area of investment funds for the company BTG Pactual. I constantly use integrations and communications with APIs, React, Typescript, React Context, Jest, Vitest, Vite. I value the best possible user experience and excellent customer communication.

My main characteristics that I put into practice at work are good communication and interactivity with the teams, group problem solving having the support of each other, persistence in my performance and study at work.

Desenvolvedor de front-end
outubro de 2022 - junho de 2024 (1 ano 9 meses)
Rio de Janeiro, Brasil

I have worked at "Vai na Web" as a Junior Front-End Developer. I am very grateful to the whole team at Vai na Web because I started my first contact with programming through their course and today I have the opportunity to have acquired my first position in the programming area in this company.

I used mainly HTML5, CSS3, JavaScript, TypeScript and the Vue.JS3 framework. Through Vai na Web I'm working in a team in a library project for BTG Pactual company. I develop components acting in the Vue team, working on the study, organization, construction, documentation and unit testing in jests of each one of them. I also work using storybook in the project and constantly use GitFlow and PairProgramming experiences on a daily basis.

Editora Globo
Young Apprentice
junho de 2022 - setembro de 2022 (4 meses)
Duque de Caxias, Rio de Janeiro, Brasil

I had my first professional experience working at Editora Globo (Parque Gráfico) as a "Jovem Aprendiz" (Young Apprentice) . I developed knowledge with Excel spreadsheets and worked with administrative routines in the printed services area, mainly in the Production Planning and Control (PCP) sector. I acquired knowledge about the production system and quality controls of the productions of Editora Globo (Parque Gráfico).
